

UNICACOATINGS
Protection for the future

Project Experience

Fishing boat "Carmita GG 298"

Project information

Location	Skärhamn
Owner	Christian Johanisson
Project	Total repainting
Date	2013-03 and ongoing

Systems and substrates

Pretreatment	Shifting from St 1 to St 2 and 200 bar water cleaning	
2 coat system	Uni-Micazinc	75 µm T/U
	Uni-Finish MC	75 µm Full coat

The boat built by Aluminum and glass fiber was coated with a traditional 2 comp system that failed after just a few years.

All aluminum was cleaned by detergent and washed down by water before the topcoat was applied direct on the bare surface without any primer.

The glass fiber was cleaned by detergent to remove all loose paint before the top coat was applied direct on the surfaces.

All steel items onboard was chipped by hand and washed with water before the Micazinc and topcoat was applied.
