

SPLIETHOFF'S B.V.

Customer Needs:

A high corrosion and abrasion resistant coating system. Easy to repair and to maintain while at Sea.

The Problem:

On board of the ConRo ships, the weather-decks and the loading ramps are subject to high wear.

If the wear-down coating get wet it tends to get very slippery and of course rusting of the surface occurs.

The solution:

After cleaning the surfaces using handtool acc. to St.3, the treated areas were coated to full satisfaction with a Unica System:

- | | | |
|-----------------|--|------------|
| 1. Primer | Uni-Micazinc MC Grey | DFT 75 µm |
| 2. Intermediate | Uni-Aluprotector
with Aluminium NON-skid,
(if necessary) | DFT 120 µm |
| 3. Topcoat | Uni-Aluprotector | DFT 120 µm |
