

UNICACOATINGS
Protection for the future

Project Experience

SSAB Sweden

Project information

Location	Oxelösund
Owner	SSAB
Project	Mold
Date	2013

Systems and substrates

Pretreatment	Shifting from SA 1,5 to SA 2	
2 coat system	Uni-Micazinc MC	250 µm
	Uni-Finish MC	75 µm

The project to protect the 300 m² large mold section was started in 2013-03. The daily temperatures dropped below zero and delayed the completion of the mold.

Unica where chosen and the mold where painted outdoor during the winter in minus degrees and with out any additional heating.

Low pH and high temperature and vibrations were the reason why the original coating failed.

The mold was set in to Production during the summer 2013
