Protection for the Future

# Project Experience

## 20000 DWT Oil Tanker

### Project information

<b>Location</b>	UAE
<b>Owner</b>	
<b>Project</b>	Main deck
<b>Date</b>	2013-03 and ongoing

### Systems and substrates

<b>Pretreatment</b>	Shifting from St 1 to St 2	
<b>3 coat system</b>	Uni-Micazinc	75 µm T/U
	Uni-Micazinc	75 µm T/U
	Uni-MC topcoat	75 µm Fullcoat

The project to protect the 3000 m<sup>2</sup> large main deck section was started 2012. The daily temperatures is as high as +50 deg C at day time making it impossible to use normal 2 component paint due to it's ultra short pot life in this heat.

Unica where chosen due top the UV resistance we have proven to have and the fact that it is a one component that can handle the moisture content in the area that is as high as 95%.

The job is performed by the vessels crew with out help from any contractors.
